GROENEVELD LUBRICATION SOLUTIONS

Groeneveld: A global partner

Groeneveld Lubrication Solutions, part of the Timken Company, is a global company with approximately 600 employees. The company has around 30 branches, resulting in worldwide coverage. In many countries, Groeneveld is also represented by independent dealers and distributors – all

motivated like our own organization to offer added value to the customer. Groeneveld is pleased to assist with the installation and maintenance of your systems. Visit the Groeneveld page for contact details for Groeneveld subsidiaries, distributors and service providers.

MultiLine AC Automatic Lubrication

Self-installing system for various applications

Automatic lubrication is more effective than manual lubrication because the grease is spread more evenly over the surface to be lubricated in the application. In addition, the grease is applied in smaller doses at regular intervals, providing optimal lubrication. This also results in a grease paste on the outer edge of the lubrication points, preventing dirt, dust and water. Thus, automatic lubrication offers many advantages:

- Longer lifespan
- Lower repair and maintenance costs
- Increased vehicle uptime
- Greater productivity
- higher residual value
- Up to 50% less grease consumption
- No time wasted with manual lubrication

GROENEVELD LUBRICATION SOLUTIONS

Self-installing automatic lubrication system

MultiLine AC is a range of automatic lubrication systems designed for self-installation on, for example, trucks, trailers, agricultural equipment and compact earthmoving machines. With it, it is possible to use automatic lubrication in applications where it is difficult to achieve a return on investment. The MultiLine AC kit

is ready to be installed by your own technicians. Choose between 1.25 and 2 liter reservoirs. Automatic lubrication of all lubrication points significantly extends the service interval and service life of the application. This makes MultiLine AC a smart investment when it comes to operational efficiency.

With MultiLine AC, it is possible to use automatic lubrication in applications where it is difficult to achieve a return on investment. The MultiLine AC kit is ready to be installed by your own technicians.

- Capable of pumping lubricants from SAE 80/90 oil to NLGI-2 grease.
- Available for up to 60 lubrication points.
- Designed for self-installation
 - All components in one box
 - All connections are standard, with push-to-connect connectors
 - The lines are numbered
 - Lines are pre-cut and grouped
- Economical solution for efficient lubrication of diverse applications such as platform lifts, fifth wheels, trucks, tractors and compact earthmoving equipment.
- Reduces operating costs and increases efficiency
- Waterproof and corrosion resistant

1 + Cost reduction
 Incorrect or lack of lubrication can lead to application failure. A fully automated lubrication system will dramatically reduce the need to replace worn components, minimize maintenance cycles and significantly lower the cost of lubricants.

2 + automatic lubrication
 Automatic lubrication during operation ensures that the correct amount of lubricant is applied at all times, providing smooth operation and extending service life by preventing dirt and moisture from entering during operation.

3 Reduction in the time of + vehicle downtime
 It is essential that your commercial vehicle generates an acceptable amount of profit. Reduce damage from vehicle downtime by reducing maintenance schedules and extending the life of critical components.

Ready-to-install kit

The pre-assembled kit contains all the necessary items: injectors, pipes, connectors and adapters for complete installation. A schematic drawing is provided to facilitate installation. It takes approximately one hour to install the pump and 15 minutes per lube point. Ready-to-install kits with 12, 24 or 36 lubrication points ensure quick installation and trouble-free operation.

GreenLube grease

Groeneveld has the right type of grease for every application and every system. This is the guarantee of trouble-free operation of your system and perfect lubrication of your trucks, trailers and equipment.

Using the right type of high quality grease maximizes the results of a MultiLine AC automatic lubrication system.
